

Kalid Adem

Software Engineer & AI Developer (Backend Focus)

Addis Ababa, Ethiopia | kjbuta@gmail.com | +251 909 561 875
GitHub: Kthesword | LinkedIn: kalid-adem

Technical Skills

- Backend & APIs: NestJS 11, Node.js, Express, Golang, Python, REST APIs, WebSockets
- Databases & Auth: PostgreSQL, Prisma ORM, MongoDB, Firebase, Clerk Auth
- Architecture & Tools: Docker, Turborepo, Server-Enforced RBAC, Git, System Design
- Languages: TypeScript, JavaScript, Python, Golang, C++
- Algorithms: Data Structures & Algorithms, Competitive Programming (340+ Solutions)

Experience

GoldenAge Technology PLC

Software Engineering Intern (Present) | Addis Ababa, Ethiopia

- Contributing to OpsFlow, an enterprise operations platform for asset management.
- Building robust backend services using NestJS 11, PostgreSQL & Prisma ORM.
- Implementing Role-Based Access Control (RBAC) and Socket.IO WebSockets.

Africa to Silicon Valley (A2SV)

Software Engineering Intern (Summer 2025) | Remote

- Collaborated on Remedymate, a healthcare mobile and web application.
- Implemented secure user authentication flows and dynamic reminder notifications.
- Followed test-driven development practices and rigorous peer code reviews.

Featured Backend & Systems Projects

OpsFlow (Enterprise Operations Platform)

- Tech Stack: NestJS 11, PostgreSQL, Prisma ORM, Socket.IO, TypeScript, Turborepo
- Engineered a multi-stage approval automation system and real-time collaboration engine.

Job Listing Platform (Full-Stack Engine)

- Tech Stack: Next.js, Node.js, TypeScript, PostgreSQL
- Built a high-performance backend supporting job discovery, filtering, and endpoints.

Competitive Programming & DSA Mastery

- Maintained a curated repository of 340+ optimized solutions (LeetCode/Codeforces).
- Achieved Top 5% in ASTU Entrance Contest among 400+ candidates.

Education

Adama Science and Technology University (ASTU)

Bachelor of Electronics Engineering (2023 - 2027)

Coursework: Control Systems, Signal Processing, Embedded Systems, DSA
